DBE Program Overview

The U.S. Department of Transportation's DBE (disadvantaged business enterprise) program provides a vehicle for increasing the participation by MBEs (minority business enterprise) in state and local procurement. DOT (Department of Transportation) DBE regulations require state and local transportation agencies that receive DOT financial assistance, to establish goals for the participation of DBEs. Each DOT-assisted State and local transportation agency is required to establish annual DBE goals, and review the scopes of anticipated large prime contracts throughout the year and establish contract-specific DBE subcontracting goals. Along with the OSDBU, the [Departmental Office of Civil Rights](#), and the [Office of the General Counsel](#); there are three major DOT operating administrations are involved in the DBE program. They are the [Federal Highway Administration](#), the [Federal Aviation Administration](#) and the [Federal Transit Administration](#).

In addition to establishing goals, state and local recipients also certify the eligibility of DBE firms to participate in DOT-assisted projects. Some groups are presumed to be socially and economically disadvantaged for the purposes of participation in this program. In 1987 Congress added women to the groups presumed to be disadvantaged. The main objectives of the DBE Program are:

- To ensure that small disadvantaged business enterprises (DBE) can compete fairly for federally funded transportation-related projects.
- To ensure that only eligible firms participate as DBEs.
- To assist DBE firms in competing outside the DBE Program.

There has been, since 1983, a statutory provision requiring DOT to ensure that at least 10% of the funds authorized for the highway and transit financial assistance programs be expended with DBEs. DOT has established a single DBE goal, encompassing both firms owned by women and minority group members.

Contracts for businesses that are DBE certified are always available because government entities which receive funding from the Department of Transportation (DOT), the Federal Aviation Administration (FAA), the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA) are required to make contracts available to companies with a DBE certification. All state and local government entities who are recipients of funds from the FAA and FTA must have a DBE program if they plan to award contracts exceeding \$250,000. All recipients of Federal FHWA funds must have a DBE program regardless of projected contract amounts.

In order for the entities who receive funding from the Department of Transportation to continue receiving those funds they must show that they have awarded contracts to companies who are DBE certified. Each year these government entities must set a goal for utilizing DBE certified firms on their projects. The end result is that there is a demand for DBE certified firms.

Both the government agencies who set the goals and the non-DBE prime contractors that they hire are actively looking for companies with a DBE certification in order to meet their required goals. These government entities and the larger non-DBE firms with which they contract must use the services of DBE certified companies to fulfill their requirements with the Department of Transportation.

What is DBE?

The Department of Transportation's (DOT) disadvantaged business enterprise (DBE) is an affirmative action program designed to combat discrimination and its continuing effects by providing contracting opportunities on Federally-funded highway, transit, and airport projects for small businesses owned and controlled by socially and economically disadvantaged individuals.

Goal of DBE:

As a recipient of federal financial funding of the USDOT, the LADOTD has established a Disadvantaged Business Enterprise (DBE) Program as set forth herein and hereby provides its assurance that it will comply with the provisions of this program and the regulations of the USDOT as set forth in 49C.F.R. Part 26.

The goal of the disadvantage business enterprise program is to provide guidance on the implementation of the disadvantaged business enterprise plan of the City of Monroe so as to increase the participation of DBE businesses in procurement activities awarded by the city pursuant to DOT -assisted programs and Title 49, Code of Federal Regulations, Part 23.

Ord. No. 9090, Sec.3, 9-12-89

Objectives

The objectives of the disadvantaged business enterprise program are to:

1. Coordinate the implementation of a comprehensive DBE program.
2. Design steps to overcome barriers to increase utilization of DBEs.
3. Provide guidance to personnel in all departments vested with authority to advertise bids and to conduct related procurement activities which may involve DBE businesses.
4. Establish goal-setting procedures and reporting system for DBE program for each department.
5. Ensure a contracted effort to attain projected annual goals for DBE program.

Ord. No. 9090, Sec.3, 9-12-89

Policies of DBE

It is the policy of the City of Monroe, in compliance with Title 49, Code of Federal Regulations, Part 23, as amended, issued by the United States Department of Transportation to establish procedures by which DBEs will have maximum opportunity to participate in DOT- assisted contracts. Title 49, as amended, requires that the City of Monroe, its bidders and its contractors utilize small business and women-owned businesses to the maximum extent feasible in all phases of its procurement practices.

It is also the policy of the City of Monroe to provide an equal opportunity for DBEs/ WBEs in the areas of construction, professional service, equipment and supplies, and generally fulfilling whatever other procurement requirements the city may have with respect to DOT -assisted contracts.

Ord. No. 9090, Sec.3, 9-12-89

Procedures

To the extent legally practicable, the City of Monroe will ensure that all contractors participating in federally funded or assisted contracts of the city comply with applicable federal prevailing wages and that all contractors providing services, materials or supplies to the city provide employment opportunities to minorities and females equal to those provide to all other groups or individuals.

Contractors will also be expected to take positive steps toward the utilization of DBEs and WBEs to the maximum extent feasible, consistent with sound procurement principles and applicable law. This includes providing the necessary documentations as evident toward meeting established goal and good faith documentation when goals cannot be met within the required USDOT time.

Upon request, the city will provide DBEs/WBEs with information on the preparation of bid specification, fulfillment of general requirements, job performance requirements and procurement opportunities and perquisite for bidding on contracts. The City of Monroe encourages joint ventures among DBEs/WBEs and between majority and minority firms bidding for city contracts.

The City of Monroe will use its best efforts to ensure that DBEs and WBEs are informed of current and future procurement activities through utilization of newspapers(including minority -owned newspaper), and other DBE/DWE assistance organization and well through direct contact with DBE/WBE entrepreneur.

Qualifications for DBE Certification

In order to qualify as a DBE one must meet the following:

- Must be a socially and economically disadvantaged individual who own at least 51% and controls the business.
- Is a disadvantaged U.S. citizen or lawfully admitted permanent resident of the U.S.
- Meets the Small Business Administration (SBS's) size standard and does not exceed \$23.98 million over a three year period.
- Is organized as a for- profit business.

Small Business Enterprise (SBE), Disadvantaged Business Enterprise(DBE) and Minority Business Enterprise (MBE) means a small business concern which is at least fifty-one (51%) percent owned by one or more socially or economically disadvantaged individuals, or in the case of any public owned business, at least fifty one (51) percent pf the stock of which is owned by one or more socially and economically disadvantaged individuals and whose management and daily business operations are controlled by one or more or the socially and economically disadvantaged individuals who owns it.

Socially and economically disadvantaged individuals means those individual who are citizens of the United States ((or lawfully admitted permanent resident) and are:

- Women
- Black American
- Hispanic
- Native Americans
- Asian-Pacific Americans
- Asian-Indian Americans

How to Become DBE Certified

The Federal Regulation, 49(CFR)Code of Federal Regulation requires the establishment of a single uniform process, or one stop shopping for DBE applications, certifications and development of a single point DBE directory.

The City of Monroe participates in the Louisiana Unified Certification Program (LAUCP) which establishes the Louisiana Department of Transportation and Development (LADOTD) as the single uniform process.

The DBE Certification Process is done completely by LADOTD by designated regions.

Certifiers make the determinations based upon on-site visits from certifying state personnel, personal interviews, reviews of licenses, stock ownership, equipment, bonding capacity, work completed, resume of principal owners and financial capacity.

LADOTD has established a Certification Review Team to certify eligible DBEs as required by C.F.R.49 Part 26 to participate in federally assisted contracts. Certified DBEs will be included in a DBE directory.

- The City of Monroe personnel does not certify Disadvantaged Business Enterprise firms.

The UCP will not establish, recommend or alter the DBE Plan and Program of any recipient, other than the supplement of an approved plan. The development of a DBE goal, administration, monitoring and reporting remains the sole responsibility of the recipient agency.
